

Performance Measures: Potential Reporting

Because this is the inaugural year of data collection, we cannot depict trends over time. These initial performance measurements will show a snapshot of the 2004-2005 state fiscal year. The following list demonstrates ways in which the data can be displayed.

- Washington State map depicting the service areas for each of the 34 community transportation providers and eight Medicaid transportation brokers
- Total number of passenger trips supplied by community transportation providers
- Total number of trips managed by Medicaid transportation brokers
- Average cost per trip as supplied by community transportation providers
- Average cost per trip as managed by Medicaid transportation brokers

Fictitious charts fabricated to serve as examples only.
